# Coinage Metal (Copper, Silver, and Gold) Catalysis

### Message from the Guest Editor

The subject of catalysis by coinage metals (copper, silver, and gold) keeps increasing day-by-day. This Special Issue of *Molecules*, "Coinage Metal (Copper, Silver, and Gold) Catalysis" aims to cover the numerous aspects of the use of these metals as catalysts for several reactions. This Special Issue deals with synthesis and characterization of copper, silver and gold based catalysis, their characterization and use, both for heterogeneous and homogeneous catalysts, and their potential environmental and industrial applications. ## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
