

Special Issue

Domino Reactions

Message from the Guest Editor

This Special Issue of *Molecules* "Domino Reactions" is devoted to outstanding research and review papers focused on new synthetic methodology employing domino or cascade processes. The central concept should entail a sequence of consecutive reactions resulting in the formation of several new bonds. It may include, but is not limited to, processes involving catalytic methods, photochemical activation, multicomponent reactions, or enantioselectivity. Research papers and reviews describing new examples of such reactions or their application in target-directed synthesis are welcome for this Special Issue of *Molecules*. We ask that authors contemplating submission of review papers make a pre-submission inquiry to the guest editor with a brief outline of the proposed coverage.

Guest Editor

Prof. Dr. Frederick G. West

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
