Special Issue

3D Printing Technique for the Manufacturing of Drug Delivery Systems

Message from the Guest Editors

In modern pharmaceutical technology, many novel dug delivery systems are being developed. Connected to these formulations, the role of new manufacturing methods is nonquestionable. 3D printing is a new approach in personalized medication, and it is still searching for its own function in the pharmaceutical industry and in the medical therapy. The possibility of producing individualized implants and oral drug formulations holds potential for a variety of different medical purposes. The aim of this Special Issue is to go deep into the challenges in 3D printing technologies, presenting new drug carriers for medical and pharmaceutical applications. As , we cordially invite you to contribute a research paper or review on any aspect related to this topic.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
