Special Issue

Fibre Reinforced Composites: Interfacial Modifications and Property

Message from the Guest Editor

Interfacial interactions between matrix and fibres play an important role in the mechanical, thermal, and corrosion resistance properties of fibre-reinforced composites, to name but a few. Numerous efforts have been made to improve the interfacial behaviours of fibre-reinforced composites and understand their enhancement mechanisms. Consequently, there is a need for a Special Issue to provide a broad overview and address the various aspects of this field. For readers, this Special Issue will provide an attractive opportunity to more easily access information concerning the different facets of the research into the interfaces of fibre-reinforced composites. For the authors, it will be an appropriate opportunity to increase the visibility of their results and analyses, in addition to reasserting their role as an active member of the scientific community in fibre-reinforced composites. This Special Issue will contain contributions discussing all of the aspects broadly indicated by the keywords. Reviews articles by experts in the field are also welcome.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt
Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
