Fluorescent Probes as Powerful Tools in Medicinal Chemistry

Message from the Guest Editor

Fluorescent tools play a major role in many aspects of the drug discovery and design process and have become ubiquitous. Applications include fluorescent assay development for (high throughput) screening, the design of reactive tools to guide the design of (covalent) inhibitors, designing and discovering imaging tools for biomarkers, imaging drug targets in small animal models, etc. The aim of this Special Issue is to highlight the role of these “workhorses” in chemical biology and medicinal chemistry and publish recent advancements of fluorescent tools used in the context of, or potentially applied to, drug and imaging agent development. The submission of both research reports and critical reviews, covering fluorescent probes in medicinal chemistry in the broadest sense, to this Special Issue is highly encouraged

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
