Lumino and Fluorophores— Illuminating Science and Technology

Message from the Guest Editors

Ever since the invention of lenses, man has, not only looked into the skies, but also into the realm of the invisible microscopic world of tissues, cells, and micro-organisms. The use of fluorescent labels and the development of various forms of optical microscopy, in particular confocal laser scanning microscopy (CLSM), have significantly advanced our knowledge about the basic mechanisms underpinning biology and the pathophysiological processes that lead to disease. Furthermore, fluorescence-based assays have largely replaced radioactive assays in the lab. In addition, luminescent compounds and particles have enriched various technologies, including display technology, optoelectronics, solar devices, and optical storage. It is intended that this Special Issue will consider fundamental physicochemical properties, synthesis and modification, biomedical, imaging and assay applications of luminescent compounds and fluorophores, from organic dyes to fluorescent nanoparticles and fluorescent proteins. ...

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
