

## Special Issue

# Improve Food Safety and Quality: Analysis and Methods

### Message from the Guest Editors

Food safety and quality are important issues for all of us both consumers as well as manufacturers. To improve our knowledge and awareness we need to enforce analysis and effective analytical techniques (methods) in order to provide a decisive assessment of food safety and quality. Novel analytical instrumentation, as well as novel developed methods, give us an opportunity to assess the food safety and quality from different types of compounds, elements, pathogens, and “unnecessary” food ingredients. Techniques such as, for example, ICP-OES, ICP-MS, F-AAS, GF-AAS, IR, FTIR, HPLC, HPIC, IC, LC-MS/MS, MALDI-MS, GC, GC-MS/MS, UV-VIS, NMR, LIBS, 4F, TOC, EDX, fluorescence, sample preparation methods, food indicators methods and hyphenated techniques and its methods in food analysis are welcome for submission. Moreover, statistical and chemometrics methods in food safety and food quality are welcome too. The aim of this Special Issue is to gather original research papers and review articles focused on the development and application of advanced and novel analytical techniques to develop innovative food analytical methods analysis of food for food safety and food quality.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of  
Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
