Special Issue

Research and Application of Food By-Products

Message from the Guest Editors

The aim of this Special Issue of Molecules entitled "Research and Application of Food By-Products" is to present research on the application of analytical chemistry, biochemistry, molecular analysis, physical analysis, and microstructure observation in the study of food byproducts. Additionally, methods of processing raw materials and optimization of the food production process with food byproducts can be presented. Therefore, in this Special Issue, I encourage you to provide the latest scientific news, insights, and advances in the field analysis and processing of food byproducts.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: the use of analytical chemistry, molecular analysis, physical analysis, and microstructure observation of food byproducts. In addition, the way of processing raw materials and the optimization of the production process of food products with waste additives are welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
