

## Special Issue

# Hyperpolarized Molecules for Applications in Chemistry and Biomedicine

### Message from the Guest Editor

Nuclear magnetic resonance spectroscopy (NMR) and imaging (MRI) are among the most powerful analytical tools used to study chemical and biochemical transformations. However, one of the main drawbacks of NMR and MRI is their low sensitivity. Hyperpolarization techniques allow enhancing the NMR signals of various molecules by several orders of magnitude, making possible applications that were previously inaccessible, i.e., monitoring metabolism of small molecules *in vivo*. Researchers working in the field of hyperpolarized NMR/MRI are invited to contribute original research papers or reviews to this Special Issue of *Molecules*, which will report on the chemistry and physics of hyperpolarization formation, improvements in the detection of hyperpolarized molecules, and applications of hyperpolarized NMR/MRI approaches in chemistry and biomedicine.

### Guest Editor

Dr. Danila Barskiy

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
