

Special Issue

Indole, Azaindole and Indazole Derivatives and Their Compounds with Metal Ions

Message from the Guest Editor

Indole, azaindole, and indazole derivatives are the subject of intense research owing to their wide range of biological activity. These heterocycles, depending on the type of substituent and its position in the five- and six-membered rings, can form hetero- and homoleptic coordination compounds including coordination polymers and metal–organic compounds with interesting structures and properties. This Special Issue shall cover new research and review works developed so far in the field of the title compounds, with the aim of making an important contribution to the community. A combination of experimental and theoretical studies, also including the potential application of both ligands and their compounds with metal ions, are welcome.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
