Special Issue

Recent Developments of the Kinugasa Reaction

Message from the Guest Editor

□-Lactams are possibly one of the best known and extensively investigated heterocyclic ring systems as a result of both their biological activity as antibiotics, and their utility as synthetic intermediates. Among the different synthetic approaches for the preparation of □-lactams, the Kinugasa reaction has caught the attention of the scientific community, highlighting the great synthetic potential of this reaction. This Special Issue will contain contributions discussing all the different aspects broadly indicated by the keywords. Review articles by experts in the field will also be welcome. Prof. Dr. José Marco-Cntelles

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt
Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
