

## Special Issue

# Metal Complexes as Potential Antimicrobial and Antiproliferative Agents

### Message from the Guest Editor

In recent decades, a large number of coordination compounds with antimicrobial and/or antitumor activity have been published. The huge interest in developing such species comes from the increased resistance of germs/tumor cells as well as from the ability of pathogenic microorganisms to develop biofilms on prosthetic materials or natural tissues. The synthesis strategies are oriented toward the use of transition metal ions, which are involved in different biological processes and polydentate ligands, either synthetic or natural, sometimes with proven antimicrobial activity. The purpose of this Special Issue is to join the effort to find new species with improved biological activity and low toxicity.

### Guest Editor

Prof. Dr. Mihaela Badea

Department of Inorganic and Organic Chemistry, Biochemistry and Catalysis, Faculty of Chemistry, University of Bucharest, 90-92 Panduri Str., 050663 Bucharest, Romania

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
