

Special Issue

Potential Anti-SARS-CoV-2 Molecular Strategies

Message from the Guest Editors

In this Special Issue, we wish to focus on the area of novel anti-coronavirus drug discovery, design, and development, with the main interest, obviously, on the most pathogenic CoVs and in particular SARS-CoV-2 and MERS-CoV. However, contributions on other CoVs are also welcome as they could improve overall knowledge on the Coronaviridae. Other themes of interest are inherent in the development of vaccines against CoVs, and the investigation of the biomolecular processes targetable by anti-CoV strategies. The issue is open to the submission of both original articles and reviews that describe research and ideas on themes around anti-CoV molecular strategies.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
