Special Issue

Theme Issue in Honor of Professor Atta-Ur-Rahman, FRS

Message from the Guest Editors

This Special Issue will honor Prof. Atta-ur-Rahman for his pioneering contribution in the field of Bioorganic, Synthetic, and Natural Product Chemistry and the establishment of ICCBS as a leading institution internationally, in the field of Natural Product Chemistry. We aim to collect original research articles and review articles in the following topics:

- Isolation and structure elucidation of bioactive compounds;
- Development of new methods for structure elucidation;
- Synthetic transformations of biologically and biosynthetically interesting compounds;
- Plant metabolomics.

You are welcome to visit the Website and submit your contribution here!

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief
