Inorganic Materials Chemistry

Message from the Guest Editor

In order to outline recent advances in synthetic inorganic chemistry of nanomaterials this Special issue aims to collect reviews, communications and research articles on different aspects of *Inorganic Nanochemistry*. Reports on directed inorganic synthesis of nanoparticles or their chemical modification as well as investigations shedding light on reaction mechanisms for formation of inorganic nanoparticles on molecular level are welcome.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief
