

## Special Issue

# Novel COVID-related Anti-inflammatory Therapies

### Message from the Guest Editor

The COVID-19 pandemic will continue to infect a large portion of the world's population and cause substantial morbidity and mortality until either an effective vaccine or a useful antiviral therapeutic is developed. To date, potential vaccines have a long lead time for development and their potential efficacy is uncertain given past failures with coronavirus vaccines. Furthermore, there is no approved antiviral therapy for COVID-19 infection. Therefore, alternative approaches must be explored in the hope of diminishing the potential consequences of COVID-19. Since many patients with COVID-19 show a massive cytokine release ("cytokine storm"), anti-inflammatory drugs have been suggested as potential treatments. This Special Issue of *Molecules* focuses on anti-inflammatory approaches to treat the immune dysregulation in COVID-19.

### Guest Editor

Prof. Dr. Christian Lehmann

Department of Anesthesiology, Dalhousie University, Halifax, NS, Canada

### Deadline for manuscript submissions

closed (31 July 2021)

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
