

Special Issue

New Transition Metal Complexes as Chemotherapeutic Agents

Message from the Guest Editors

This Special Issue of *Molecules* welcomes original research articles, communications, and reviews dealing with the synthesis and biological evaluation of transition metal complexes with original structures and coordination geometries that provide an effort to go beyond the cisplatin structure and its biological profile. A special focus is dedicated to organometallic complexes whose activity relies on transition metals other than platinum, and their application to the treatment of orphan tumors.

Guest Editors

Dr. Giorgio Facchetti

Department of Pharmaceutical Science, University of Milan, Milan, Italy

Dr. Isabella Rimoldi

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
