

Special Issue

Bioactive Compounds against Parasite, Bacteria and Related Diseases

Message from the Guest Editors

This Special Issue will be devoted to in vitro and in vivo studies on the activity of such compounds against parasitic, fungal, and bacterial pathogens. Studies, as well as reviews, about sources and biological effects of bioactive compounds are also welcome. You are welcome to visit the [website](#), submit the [abstract](#), and [full paper](#). If you have any questions, please feel free to contact Larry Li (larry.li@mdpi.com). We look forward to receiving your contribution!

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief
