Novelties in N-Heterocycles Chemistry: From Synthesis to Application

Message from the Guest Editors

N-Heterocycles are ubiquitous not only in organic chemistry, but also in medicinal chemistry, materials science, agrochemistry, and other related fields. It is rare to find a scientific group whose work or part of it would not directly or indirectly come into contact with nitrogen-containing heterocycles. Therefore, the development of the chemistry of nitrogenous heterocycles is of paramount importance not only for researchers working directly in this field, but also for scientists in related branches of science. The purpose of this Special Issue is to demonstrate the latest synthetic methods, rich chemistry and the broadest possibilities of using nitrogen-containing heterocycles. Prof. Dr. Leonid L. Fershtat

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
