

Special Issue

Natural Products for Cancer Chemoprevention

Message from the Guest Editor

This issue focuses on the identification and use of selected naturally-occurring foodstuffs, and of compounds in these foods, for use in the prevention of cancer. The relative merits of using whole foods versus individual compounds within these foods for cancer prevention are discussed. Where available, the results are presented from both preclinical studies and clinical trials of these foodstuffs and their compounds. These results include toxicity assessments, pharmacokinetic studies of compound bioavailability, and mechanisms of inhibition of both the initiation and promotion/progression stages of cancer development. Future directions for the use of both whole foods and individual compounds for the more effective chemoprevention of specific cancer types are discussed.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
