## **Special Issue**

# Natural Compounds in Modern Therapies

## Message from the Guest Editors

Over the last few years, many innovative therapeutic strategies that combine nanotechnology, bioengineering, and molecular biology have been developed, but their effectiveness is minimal due to cancer cells' secondary and primary resistance. There is a growing interest in medicinal plants and compounds isolated from them with various biological activities. Plants are considered factories of biologically active compounds not only for the production of primary metabolites but also for secondary ones. Among such substances, we can distinguish phenolic compounds, terpenoids, and nitrogen compounds, with significant therapeutic potential in the course of related reactions degenerative processes, treatment of metabolic, inflammatory, or neurological diseases. This Special Issue aims to collect interesting information for the scientific community that deals with the bioactivity of plant extracts and natural compounds. The focus will be on research articles and reviews, including reports of anticancer, antioxidative, anti-inflammatory, and antiinfectious, characteristics, as well as studies assessing the influence of natural compounds on age-related disorders and metabolic syndrome.

## **About the Journal**

## Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

#### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

#### **Author Benefits**

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
