

Special Issue

Nucleosides and Nucleotides

Message from the Guest Editor

Nucleosides and nucleotides continue to underpin key areas of medicinal chemistry; chemical biology; biotechnology; and, more recently, synthetic biology and nucleic acids-based materials. The preparation of nucleoside-based antivirals is even more pertinent in the current climate, alongside nucleic acids-based technologies that provide the foundations for the detection of viral infections. Despite this plethora of critical applications, the chemistry of nucleoside and nucleotide transformations remains challenging, and this Special Issue aims to share new synthetic insights and applications of nucleoside and nucleotide chemistry.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
