Special Issue

Organic Chemistry in the USA

Message from the Guest Editors

Organic chemistry has traditionally been positioned at the forefront of chemical research. It broadly encompasses the study of structure, study of properties, and chemical reactivity via the laboratory and via theoretical (in silico) methods. The study of organic reactions includes synthesis of novel molecules, natural products, drugs, polymers, etc. Chemists in the US has traditionally spearheaded efforts in many areas. Thus, providing a convenient avenue for the dissemination of interesting results from US laboratories is of interest for the organic chemistry community. This Special Issue aims to illustrate the most recent and pertinent developments in organic chemistry, organic synthesis. etc. The contributions will focus on a broad range of organic studies, methodologies, or reactions. This Special Issue of *Molecules* journal collects articles from the best research groups in the US, representing not only the 50 states but also unincorporated territories of the United States The readers will be able to find diverse articles on the topic of organic chemistry, including communications, full papers and reviews.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
