

Special Issue

Reactive Intermediates

Message from the Guest Editor

The knowledge of reactive intermediate chemistry is central to develop modern mechanism and quantitative understanding of Organic Chemistry. This special issue tries to be a summary of the latest advances in this topic, both from the reactivity of the characterization point of view. We pretend to include research results in the chemistry of many types of reactive molecules as intermediates, starting from carbocations, carbanions or free radicals and continuing through carbenes, nitrenes or arynes. On the other hand, advanced experimental techniques of modern physical-organic chemistry, isolation methods and characterization of highly reactive molecules will be welcome. We invite the scientific community to take part of this project.

-Alvarez

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
