

## Special Issue

# Wine Chemistry: The Key behind Wine Quality—2nd Edition

### Message from the Guest Editors

Wine is a surprisingly complex chemical mixture. It is 97% water and ethanol, but each bottle also contains thousands of different molecules, ranging from acids and sugars to phenolic compounds and aroma compounds. The first edition was closed successfully, the second edition is also dedicated to the most recent research aimed at understanding how viticultural and enological practices influence grape and wine chemistry, how wine chemistry can help to fingerprint wines and follow their traceability and, going even further, how this chemical composition can be linked to sensory properties. You are welcome to visit the [website](#), submit the [abstract](#), and [full paper](#). Any questions please feel free to contact the managing editor Larry Li ([larry.li@mdpi.com](mailto:larry.li@mdpi.com)). We look forward to receiving the contribution from you!

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
