

# Special Issue

## Fining Agents in Wine

### Message from the Guest Editors

Wine fining is an enological practice used over the centuries to eliminate undesirable wine components that may negatively affect quality, stability and/or safety. The final aim is to improve the visual and sensory quality of the resulting wine and to limit the presence of undesirable substances. Some of the fining agents have been used for a long time, however, in recent years, problems with some of them due to their allergenic nature have led to a search for alternatives and innovative processes. Due to all these aspects, we feel that there is a need for a Special Issue to join together the various and latest findings of this field. For the readers, this Special Issue will provide an attractive opportunity to more easily obtain information concerning the different facets of wine fining. For the authors, it will be an appropriate occasion to make their results and analyses more visible. This Special Issue will contain contributions discussing all the aspects broadly indicated by the keywords. Review articles by experts in the field will also be welcome.

---

### Guest Editors

Dr. Encarna Gómez-Plaza

Food Science and Technology Department, Faculty of Veterinary Science, University of Murcia, Campus de Espinardo, 30071 Murcia, Spain

Dr. Rocio Gil-Muñoz

Murcian Institute of Agricultural and Environment Research and Development (IMIDA), Ctra. La Alberca s/n, 30150 Murcia, Spain

---

### Deadline for manuscript submissions

closed (15 November 2019)

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
