

Special Issue

Fining Agents in Wine

Message from the Guest Editors

Wine fining is an enological practice used over the centuries to eliminate undesirable wine components that may negatively affect quality, stability and/or safety. The final aim is to improve the visual and sensory quality of the resulting wine and to limit the presence of undesirable substances. Some of the fining agents have been used for a long time, however, in recent years, problems with some of them due to their allergenic nature have led to a search for alternatives and innovative processes. Due to all these aspects, we feel that there is a need for a Special Issue to join together the various and latest findings of this field. For the readers, this Special Issue will provide an attractive opportunity to more easily obtain information concerning the different facets of wine fining. For the authors, it will be an appropriate occasion to make their results and analyses more visible. This Special Issue will contain contributions discussing all the aspects broadly indicated by the keywords. Review articles by experts in the field will also be welcome.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
