Message from the Guest Editors

Dear Colleagues,

With a great emergency of severe systemic fungal diseases in the last few decades, it has become imperative to develop new and advanced methods to detect and analyse fungal pathogens. Even though several antifungals have been suggested to combat such infections, the emergence of drug resistance mechanisms highlights the importance of performing new studies to address and to identify virulence factors, analyse host–fungi interactions, improve the overall understanding of fungal pathogenesis, and explore new drug targets.

The proposed Special Issue will collect information about methods and protocols used to study fungal pathogenicity, helping to identify promising ways to deal with antifungal resistance and to develop new drug targets.

Dr. Ricardo Franco-Duarte

Message from the Editor-in-Chief

Methods and Protocols (ISSN 2409-9279) is an open access journal devoted to the publication of new procedural approaches and cutting-edge methodological developments. The ultimate objective of this new forum of scientific communication is to provide researchers with an indispensable tool, enabling better use of the latest scientific technologies. With a broad and totally interdisciplinary focus, *Methods and Protocols* was established with the objective of facilitating cross-fertilization and cross-talk in the scientific arena. Methods and protocols in Life Sciences, Chemistry, Biomedical Sciences, Engineering, and in their intersections such as Biotechnology and Nanotechnology will constitute the core of the journal. However, we anticipate that other fundamental disciplines such as Physics or Geology will be rapidly incorporated.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and many other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 25.4 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2021).
