

# Special Issue

## Analytical Methods in Natural Sciences and Archaeometry

### Message from the Guest Editors

This Special Issue of *Methods and Protocols*, entitled “Analytical Methods in Natural Sciences and Archaeometry”, aims to provide a comprehensive overview of the latest advancements and applications of said fields. We invite researchers and scientists to submit original research, review articles, and methodological papers that present new or updated methods/techniques in the fields of Physics, Chemistry, Biology, Geology, Computational Methods and Archaeometry that enhance our understanding of processes and materials. Submissions should be related to the collection, analysis and interpretation of data in the above fields, aiming to shed light on the composition or the properties of the materials studied. Special emphasis will be placed on novel approaches that promote interdisciplinary collaboration, sustainability, and accuracy. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Methods and Protocols* (ISSN 2409-9279) is an open access journal devoted to the publication of new procedural approaches and cutting-edge methodological developments. The ultimate objective of this new forum of scientific communication is to provide researchers with an indispensable tool, enabling better use of the latest scientific technologies. With a broad and totally interdisciplinary focus, *Methods and Protocols* was established with the objective of facilitating cross-fertilization and cross-talk in the scientific arena. Methods and protocols in Life Sciences, Chemistry, Biomedical Sciences, Engineering, and in their intersections such as Biotechnology and Nanotechnology will constitute the core of the journal. However, we anticipate that other fundamental disciplines such as Physics or Geology will be rapidly incorporated.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Biochemistry, Genetics and Molecular Biology (miscellaneous))
