Single-Molecule Techniques

Message from the Guest Editor

Single-molecule techniques are the most desirable tool kits in many aspects of research today, not only to answer fundamental questions but also to enable high-sensitivity detection of small molecules and biomarkers. With their ever-improving spatial and temporal resolution, single-molecule techniques such as fluorescence microscopy, optical tweezers, and atomic force microscopy have enabled single-molecule analysis of increasingly complex systems, such as live cells. In this Special Issue on “Single-Molecule Techniques”, we welcome both original research and review articles as well as protocols pertaining to current applications of single-molecule techniques in many different areas of scientific inquiry including structural studies, DNA- as well as protein-DNA biophysics, enzymology, chemical biology, medicinal chemistry, nanotechnology and many more. In addition, we aim to present exemplary research findings from single-molecule studies.

About the Journal

Message from the Editor-in-Chief

Methods and Protocols (ISSN 2409-9279) is an open access journal devoted to the publication of new procedural approaches and cutting-edge methodological developments. The ultimate objective of this new forum of scientific communication is to provide researchers with an indispensable tool, enabling better use of the latest scientific technologies. With a broad and totally interdisciplinary focus, *Methods and Protocols* was established with the objective of facilitating cross-fertilization and cross-talk in the scientific arena. Methods and protocols in Life Sciences, Chemistry, Biomedical Sciences, Engineering, and in their intersections such as Biotechnology and Nanotechnology will constitute the core of the journal. However, we anticipate that other fundamental disciplines such as Physics or Geology will be rapidly incorporated.

Editor-in-Chief

Prof. Dr. Fernando Albericio

1. School of Chemistry and Physics, University of KwaZulu-Natal,
Durban, South Africa

2. Department of Organic Chemistry, University of Barcelona,
Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Biochemistry, Genetics and Molecular Biology (miscellaneous))
