## Methods and Protocols in Recent Artificial Intelligence

### Message from the Guest Editors

Artificial Intelligence (AI) in general is one of the most exciting and rapidly growing research fields today. AI has been successfully applied to solve practical problems in different academic and industrial domains, comprising healthcare, psychology, economics, medicine, biology, manufacturing, sociology, transportation, etc. This Special Issue aims to provide a forum covering the latest progresses in new AI models, methods, technologies, structures, protocols, etc.

Keywords:

- deep learning
- artificial intelligence
- machine learning
- data mining
- methods and protocols

## About the Journal

### Message from the Editor-in-Chief

*Methods and Protocols* (ISSN 2409-9279) is an open access journal devoted to the publication of new procedural approaches and cutting-edge methodological developments. The ultimate objective of this new forum of scientific communication is to provide researchers with an indispensable tool, enabling better use of the latest scientific technologies. With a broad and totally interdisciplinary focus, *Methods and Protocols* was established with the objective of facilitating cross-fertilization and cross-talk in the scientific arena. Methods and protocols in Life Sciences, Chemistry, Biomedical Sciences, Engineering, and in their intersections such as Biotechnology and Nanotechnology will constitute the core of the journal. However, we anticipate that other fundamental disciplines such as Physics or Geology will be rapidly incorporated.
