submissions:

closed (31 March 2019)

Message from the Guest Editors

Rapidly increasing global consumption of natural resources demands for more efficient use, as well as for more sustainable management of energy, water, minerals, land and other natural resources. Human-centred technologies, tools and services can provide effective solutions to support sustainability in different domains.

This special issue will focus on interactive visualizations for sustainability-related applications, tools, games, and services in the private, public, and industrial sectors. The topics of interest include, but are not limited to, design, deployment and evaluation of interactive visualizations for:

- monitoring and managing generation and consumption of resources;
- analysis of generation and consumption data;
- identifying consumption patterns and behavior;
- relating consumption data, patterns, and behavior to other information;
- sharing and comparing consumption data with others;
- creating awareness, influencing choices and stimulating sustainable behavior changes

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Towards the end of 2018, I was approached to be the new Editor-in-Chief for the *Multimodal Technologies and Interaction (MTI)* journal. I was honored to be considered and happily accepted the role, starting in January 2019.

MTI is a new journal, and since starting in 2017, has published 10 issues with over 140 papers, with the number of publications continuing to grow. As Editor-in-Chief, I would like to continue increasing the number of high-quality papers that we publish, and in addition, work towards improving the journal in other ways, such as getting the journal listed on ISI, establishing an impact factor, and increasing our social media presence.

I would also like to better engage with the research community, including bringing some new members onto the Editorial Board, focusing the journal on the latest areas of interest, marketing at leading conferences and, most importantly, getting feedback from our readers.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Inspec](#), [dblp Computer Science Bibliography](#), and other databases.

Journal Rank: CiteScore - Q1 (Neuroscience (miscellaneous))
