

Special Issue

Human Computer Communications and Internet of Things

Message from the Guest Editor

With successful development of light-weight handheld devices and the deployment of wireless (cellular and Wi-Fi) networks in the past few decades, we have seen growing numbers of smart devices/things connected to the Internet, leading to the Internet of Things (IoT).

However, human computer interaction in the Internet of Things era is in its early stages. Our aim is to promote the development of human computer interaction in the Internet of Things era by creating intelligent frameworks, protocols and algorithms. The proposed Special Issue will serve as a forum for researchers from academia, government and industries to exchange ideas and present new results and provide future visions on human computer interaction in the Internet of Things.

About the Journal

Message from the Editor-in-Chief

Towards the end of 2018, I was approached to be the new Editor-in-Chief for the *Multimodal Technologies and Interaction (MTI)* journal. I was honored to be considered and happily accepted the role, starting in January 2019.

MTI is a new journal, and since starting in 2017, has published 10 issues with over 140 papers, with the number of publications continuing to grow. As Editor-in-Chief, I would like to continue increasing the number of high-quality papers that we publish, and in addition, work towards improving the journal in other ways, such as getting the journal listed on ISI, establishing an impact factor, and increasing our social media presence.

I would also like to better engage with the research community, including bringing some new members onto the Editorial Board, focusing the journal on the latest areas of interest, marketing at leading conferences and, most importantly, getting feedback from our readers.

Editor-in-Chief

Prof. Dr. Mark Billinghurst

2. Empathic Computing Laboratory, The University of Auckland, Auckland 1010, New Zealand

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, dblp Computer Science Bibliography, and other databases.

Journal Rank:

CiteScore - Q1 (Neuroscience (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
