Special Issue

Human-Food Interaction

Message from the Guest Editors

While food has always played a crucial role in lives of all living bodies, our contemporary concerns about food expands rapidly with nascent technological, environmental, and social disruptions. The ways in which food is produced, prepared, and consumed are transforming, from broader systemic changes such as distribution and waste logistics to new and experimental exploration of designing material encounters with food, as seen in the rise of gastrophysics as a transdisciplinary field of research and practice. Technologies are also transforming diverse and complex socio-cultural aspects of food. With food as a fundamental desideratum for humans and more-than-humans, how might we engage with and navigate the complex disciplinary, political, and cultural landscapes through research? This special issue invites contributions from across disciplines, with a strong focus on inter-/transdisciplinary research methods and innovative exploration of food not only as matters of fact, but of concern.

Multimodal Technologies and Interaction

About the Journal

Message from the Editor-in-Chief

Towards the end of 2018, I was approached to be the new Editor-in-Chief for the *Multimodal Technologies and Interaction* (*MTI*) journal. I was honored to be considered and happily accepted the role, starting in January 2019.

MTI is a new journal, and since starting in 2017, has published 10 issues with over 140 papers, with the number of publications continuing to grow. As Editor-in-Chief, I would like to continue increasing the number of high-quality papers that we publish, and in addition, work towards improving the journal in other ways, such as getting the journal listed on ISI, establishing an impact factor, and increasing our social media presence.

I would also like to better engage with the research community, including bringing some new members onto the Editorial Board, focusing the journal on the latest areas of interest, marketing at leading conferences and, most importantly, getting feedback from our readers.

Editor-in-Chief

Prof. Dr. Mark Billinghurst

2. Empathic Computing Laboratory, The University of Auckland, Auckland 1010, New Zealand

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, dblp Computer Science Bibliography, and other databases.

Journal Rank:

CiteScore - Q1 (Neuroscience (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
