Quantified Workplaces

Message from the Guest Editors

The workplace is the second most significant environment in the daily lives of adults, after the home. In addition to being the primary environment for economic activity, the workplace is also a place where individuals exercise their creativity, form social relationships, and develop new skills. The proliferation of pervasive devices such as smart-phones, wearable devices, and the Internet of Things (IoT) has led to a new approach in workplace studies, where sensing technologies can be used to capture workplace activities. The "quantified workplace" paradigm considers how the dynamics and health of organisations can be quantified through ubicomp technologies, and visualised in order to offer collective intelligence to the managerial stakeholders and act as individual triggers for self-reflection and behavioural change.

About the Journal

Message from the Editor-in-Chief

Towards the end of 2018, I was approached to be the new Editor-in-Chief for the *Multimodal Technologies and Interaction (MTI)* journal. I was honored to be considered and happily accepted the role, starting in January 2019.

MTI is a new journal, and since starting in 2017, has published over 800 papers, with the number of publications continuing to grow. As Editor-in-Chief, I would like to continue increasing the number of high-quality papers that we publish, and in addition, work towards improving the journal in other ways, such as getting the journal listed on ISI, establishing an impact factor, and increasing our social media presence. I would also like to better engage with the research community, including bringing some new members onto the Editorial Board, focusing the journal on the latest areas of interest, marketing at leading conferences and, most importantly, getting feedback from our readers.

Editor-in-Chief

Prof. Dr. Mark Billinghurst

2. Empathic Computing Laboratory, The University of Auckland, Auckland 1010, New Zealand

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, dblp Computer Science Bibliography, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Cybernetics) / CiteScore - Q1 (Neuroscience (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.7 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2025).
