

Special Issue

User Experience Design of Exploratory Systems

Message from the Guest Editors

User experience (UX) design is essential when creating products and concepts that are both pleasurable and useful. User experience designs can target to a special emotion, value, or experience and by doing so, increase the success of novel systems. This Special Issue addresses the encountered challenges as well as concepts and methods that can be used when conducting research on UX design for exploratory systems. Exploratory systems can include, e.g., futuristic, visionary interactive systems; going beyond the conventional input–output methods and form factors; and systems that reach out from the traditional use cases for interactive technology.

About the Journal

Message from the Editor-in-Chief

Towards the end of 2018, I was approached to be the new Editor-in-Chief for the *Multimodal Technologies and Interaction (MTI)* journal. I was honored to be considered and happily accepted the role, starting in January 2019.

MTI is a new journal, and since starting in 2017, has published 10 issues with over 140 papers, with the number of publications continuing to grow. As Editor-in-Chief, I would like to continue increasing the number of high-quality papers that we publish, and in addition, work towards improving the journal in other ways, such as getting the journal listed on ISI, establishing an impact factor, and increasing our social media presence.

I would also like to better engage with the research community, including bringing some new members onto the Editorial Board, focusing the journal on the latest areas of interest, marketing at leading conferences and, most importantly, getting feedback from our readers.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, dblp Computer Science Bibliography, and other databases.

Journal Rank:

CiteScore - Q1 (Neuroscience (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
