

## Application of Carbon Nanomaterials in Biological Detection

Guest Editors:

**Prof. Luís Moreira Gonçalves**

Universidade de São Paulo, São Paulo - SP, Brazil

**Prof. Dr. Maria Isabel Pividori Gurgo**

Sensors and Biosensors Group,  
Department of Chemistry,  
Universitat Autònoma de Barcelona,  
08193 Barcelona, Spain

### Message from the Guest Editors

Analytical chemistry is ubiquitous in biological sciences. The detection of biological molecules is of utmost importance in many crucial fields. Many strategies are applied by creative and enthusiast scientists. In this issue, we aim to show some of the possibilities making use of all different types of carbon nanomaterials. Innovative methodologies can be faster, more sensitive, more portable, cheaper or possess many other advantages according to analysts' wishes.

I hope you can participate in this issue with an exciting submission

Deadline for manuscript  
submissions:

**closed (20 June 2021)**

an Open Access Journal by MDPI

## Editor-in-Chief

Birmingham B15 2TT, UK

## Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [Inspec](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
