Deadline for manuscript
submissions:

closed (30 November 2021)

Message from the Guest Editors

Dear Colleagues,

We kindly invite you to submit your contribution to the Special Issue entitled "Delivery Systems Based on Innovative Nanomaterials". This issue will include several topics concerning innovative nanomaterials towards diagnosis, therapeutics, cosmetics, chemical and biological sensing, and regenerative medicine, amongst other relevant topics.

The main goal of this issue is to showcase innovative ways of using nanomaterials and nano-based formulations in the development of delivery systems. Up-to-date original research and reviews on the ground-breaking applications of nanomaterials will be appreciated.

Your contributions are welcome, and we look forward to receiving your interesting work.

Prof. Tânia Santos de Almeida

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
