

Special Issue

Novel Nanocomposites: Optical, Electrical, Mechanical and Surface-Related Properties (2nd Edition)

Message from the Guest Editors

The present Special Issue aims to address a broad range of subjects, from nanocomposite synthesis/fabrication, to the design and characterization of various nanocomposite materials with enhanced optical, electrical, mechanical, and surface-related properties, to the practical application of nanocomposites. The format of welcome articles includes original full papers, communications, and reviews. Potential topics include, but are not limited to, the following:

- Nanocomposite materials with enhanced optical properties;
- Nanocomposite materials with enhanced electrical properties;
- Nanocomposite materials with enhanced surface related properties;
- Nanocomposite materials with enhanced mechanical properties.

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of
Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General
Chemical Engineering)
