

## Special Issue

# Nanomaterials-Based Stretchable Sensors for Bioelectronics

### Message from the Guest Editor

Recently, flexible/stretchable electronics configured in soft, shape-conformable formats have gained great research interest due to their promising applications in bioelectronics. In this Special Issue, we welcome original research, review, mini-review, and perspective articles on themes including, but not limited to, the following:

- Nanomaterial synthesis, characterization, and optimization for flexible/stretchable sensors;
- Nanomaterials-based device for implantable bioelectronics;
- Nanomaterials for stretchable epidermal electronics;
- Nanomaterials for flexible multifunctional sensors;
- Nanomaterials for stretchable synaptic transistors;
- Design strategy for nanomaterials-based stretchable sensors;
- New manufacturing techniques for nanomaterials-based stretchable sensors;
- Multifunctional integration of nanomaterials for bioelectronics.

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

---

### Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
