

## Special Issue

# Study and Applications of Luminescent Nanomaterials

### Message from the Guest Editors

In recent years, lanthanide-doped inorganic luminescent nanomaterials have garnered significant attention due to their unique optical properties and potential application in various optoelectronic devices. These materials typically consist of a host matrix doped with lanthanide ions, which exhibit characteristic luminescence upon excitation. Lanthanide-doped inorganic luminescent nanomaterials can be employed in various fields, including optoelectronics, biomedical imaging, sensing, lighting, and security. This Special Issue welcomes contributions from various scientific and engineering communities, particularly seeking studies on inorganic materials such as oxides, phosphates, or fluorides that are doped with lanthanide ions. This Special Issue aims to present recent advances in lanthanide-doped inorganic luminescent nanomaterials as a versatile class of materials with applicative potential in optoelectronic devices, driven by their unique optical properties and tuneable luminescence. We encourage the submission of original research articles and reviews. See more information in <https://www.mdpi.com/si/242139>

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

---

### Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
