

Special Issue

Light-Matter Interaction in Nano Systems: Fundamentals and Applications

Message from the Guest Editors

This Special Issue of *Nanomaterials* aims to bring together research on light-matter interactions with research on nanomaterials. We invite authors to contribute original research articles and review articles to give a fair appraisal of the current state of the art and perspectives on the future of nanophotonics research. Potential topics include, but are not limited to:

- Nanomaterials;
- Specially designed nano-structured materials;
- Light and laser sources;
- Light trapping and cooling;
- Optical phenomena in nano-photonic structures;
- Nanofabrication techniques;
- Nanoplasmonics;
- Quantum, nonlinear and nonlocal effects in nanostructures;
- Photonic crystals;
- Nanowaveguiding devices;
- Single-photon sources.

Guest Editors

Dr. Zhengkun Fu

Dr. Lianghui Huang

Prof. Dr. Mengtao Sun

Deadline for manuscript submissions

closed (20 December 2024)

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of
Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General
Chemical Engineering)
