Advances in Nanotoxicology: Health and Safety

Message from the Guest Editors

Nanotoxicology has emerged as a prominent field within toxicology, driven by the urgent need to assess the safety of engineered nanomaterials for both human health and the environment. With the rapid integration of nanoscale materials into various aspects of daily life, such as cosmetics, food packaging, drug delivery systems, therapeutics, and biosensors, the number of individuals exposed to nanomaterials continues to rise. While nanoparticles offer significant benefits and advancements in preventing and treating various disorders, concerns have grown regarding their potential risks to human health and the environment. Consequently, nanotoxicology studies initially focused on understanding the dose-response relationship between nanomaterials and their toxicity using in vitro cell models. This Special Issue aims to compile articles that assess the potential effects of emerging nanomaterials on the environment, evaluate their impact on human health, and elucidate the toxic mechanisms induced by nanoparticles. Original research articles and reviews are welcomed.

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
