

## Special Issue

# Selected Papers from ANM2020

### Message from the Guest Editor

This Special Issue, “Advanced Nanomaterials—Selected Papers from ANM 2020”, will contain the accepted papers presented during the ANM series (<https://www.advanced-nanomaterials-conference.com/anm-home/>), related to ‘advanced nanomaterials’. The selected papers will include advanced nanomaterials, advanced graphene materials, advanced energy materials, advanced magnetic and spintronics materials, advanced polymer materials and nanocomposites, solar energy materials, etc.

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.
