

Special Issue

Nanomaterials for Applied Nanotechnology and Nanoscience

Message from the Guest Editor

To date, nanoscale technologies are actively studied and applied to solve all the most pressing global challenges, from human health to the environmental crisis. Applied nanotechnology is also substantially contributing to mitigate the dramatic effects of the current outbreak of new coronavirus, for example, by providing technologies for rapid diagnostic tests. This Special Issue is associated with the Applied Nanotechnology and Nanoscience International Conference (ANNIC 2021) and aims to showcase the most recent advances in the synthesis and characterisation of nanomaterials with a focus on their technological application. Submissions from participants to the conference and non-participants are equally encouraged, as long as they fall within the scope of this Special Issue. In this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following: nanoplasmonics, nanoelectronics, nanomagnetism, nanosensors and bionanosensors, nanocatalysis, nanochemistry, nanobiology, nanotoxicology, nanomedicine and medical nanodevices, and nanotechnology for the environment and energy.

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
