

## Special Issue

# Cancer Treatment via Nanotherapy

### Message from the Guest Editor

Nanomedicine holds great potential in the delivery of anti-cancer drugs/nucleotides/proteins, specific targeting, assessment of treatment responses, and cancer immunotherapy. A wide range of nanomaterials based on organic, inorganic, lipid, glycan compounds, synthetic polymers, and molecularly imprinted polymers have been used for the development of new cancer therapeutics. Considerable nanoparticle platforms have been developed towards clinical application. Nanomedicine has become one of the main driving forces in the field, seeking to change the landscape of cancer research, advance cancer treatment, and potentially improve patient outcomes. This Special Issue welcomes contributions devoted to the design, characterization, and application of novel nanomedicine in the delivery of anti-cancer drugs/nucleotides/proteins, specific targeting, evaluation of therapeutic responses, and cancer immunotherapy.

### Guest Editor

Prof. Dr. Lisheng Wang

Department of Biochemistry, Microbiology and Immunology Faculty of Medicine, University of Ottawa, Ottawa, ON K1H 8M5, Canada

### Deadline for manuscript submissions

closed (15 December 2022)

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General  
Chemical Engineering)
