

## Special Issue

# Micro and Nanomaterials in Cosmetics

### Message from the Guest Editors

Aiming at the evolution of the use of micro/nanotechnology, the main goal of this Special Issue is to provide a compilation of the knowledge concerning micro/nanomaterials in the cosmetic field, envisioning to provide the journal's readers with a high-quality overview of the actual scenario from science to market. In this way, we welcome all the contributions in the form of mini reviews and reviews and opinion and research articles highlighting the micro/nanomaterials' advances in green synthesis routes in relation to conventional chemical and physical synthetic routes, novel ingredient developments, safety/toxicity assessments, market data, patent analysis, industry perspective/challenges and legislation.

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General  
Chemical Engineering)
