

## Special Issue

# Perspectives and New Horizons of Nanowires: From Synthesis to Applications

### Message from the Guest Editor

This Special Issue will showcase the research on nanowires covering (but not limited to) the following topics: (i) new insights on the nanowire growth, (ii) novel synthetic methods, new materials and nanowire architectures, (iii) surface, interfaces and crystal structure in 1D nanocrystal, (iv) insights into the physical and chemical properties of nanowires, and (v) application and device implementation of nanowires. This issue will highlight interdisciplinary research with contributions from varied research fields including materials science, physics, chemistry, engineering and biology.

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
