# **Special Issue**

# Moving toward Biomimetic Tissue Engineered Scaffolds

## Message from the Guest Editors

The proposed Special Issue aims to collect innovative contributions in the tissue engineering and regenerative medicine fields, providing the state-of-the-art and the foremost research findings on the design, realization, and modification strategies to fabricate advanced biomimetic scaffolds to promote tissue regeneration. Original research as well as review articles are welcome, potential topics include but are not limited to the following:

- Biomimetic scaffolds
- Additive manufacturing
- Combined scaffold fabrication techniques
- In vivo scaffold evaluation
- Scaffold nanostructuring and modification approaches
- Nanofillers and their role
- Numerical simulations
- Transformative materials

#### **Guest Editors**

Dr. Costantino Del Gaudio

Dr. Silvia Baiguera

Prof. Dr. Lucy Di Silvio

# About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometerscale dimensions, which we call "nanomaterials". These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, Nanomaterials, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

### Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

### Author Benefits

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering )
