

## Special Issue

# Nanomaterials in Environment: Fate, Reactivity, and Transformations

### Message from the Guest Editors

This Special Issue aims to cover recent progress in fate, reactivity and transformation of nanomaterials in the environment. In this Special Issue, original research articles, short communications and reviews are welcome. Potential research areas may include (but are not limited to) the following:

- Fate of nanomaterials in the environment;
- Aggregation, dissolution and sedimentation of nanomaterials in the environment;
- Transport of nanomaterials in water or soil;
- Positive or negative effects of nanomaterials used in agriculture;
- Transformation of nanomaterials in the environment;
- Analysis of nanomaterials in the environment;
- Risk assessment of nanomaterials in the environment;
- Bioavailability, uptake and accumulation of nanomaterials in plants and aquatic organisms;
- Toxicity of nanomaterials towards model organisms in the environment;
- Stability of functional nanomaterials (e.g., iron-based nanomaterials) used for environmental remediation.

### Guest Editors

Dr. Lingxiangyu Li

School of Environment, Hangzhou Institute for Advanced Study,  
University of Chinese Academy of Sciences, Hangzhou 310024, China

Dr. Fei Dang

Institute of Soil Science, Chinese Academy of Sciences, Nanjing  
210008, China

### Deadline for manuscript submissions

closed (31 August 2023)

## About the Journal

### Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

---

### Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of  
Birmingham, Birmingham B15 2TT, UK

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General  
Chemical Engineering)
